SUMMARY

Frontend developer with experience building scalable, data-driven web applications, interactive dashboards, and enterprise reporting systems. Skilled in React, TypeScript, data visualization, and API integration, with hands-on experience delivering industrial software solutions for predictive maintenance and digital workflow management.

SKILLS

- **Frontend:** React, shadcn/ui, HTML, CSS, JavaScript, TypeScript, Bootstrap
- **Backend:** Django REST API, MySQL, Firebase, PHP
- **Data Visualization:** ECharts, Recharts, Power BI, Tableau
- **Language:** Native in Malay and Bilingual Proficiency English
- **Others:** Figma, Autodesk MAYA, Blender, Unity, Adobe Photoshop, Adobe Illustrator

WORK EXPERIENCE

Intekma SDN BHD

Software Developer

Petaling Jaya, Selangor

April 2025-Present

Industrial Equipment Monitoring Platform (VECTOR)

- Developed and enhanced VECTOR, a predictive maintenance and vibration analysis platform for industrial equipment monitoring in oil and gas environments.
- Built and improved interactive dashboards using React, TypeScript, Shadcn UI, and ECharts to visualize equipment health trends and support condition monitoring analysis.
- Integrated frontend components with backend APIs (Django-based) to display real-time and historical equipment data.
- Implemented reusable React components and report management workflows to support digitalization of engineering reporting processes.
- Developed a web-based reporting module that enabled users to create, edit, and manage engineering reports directly within the platform.
- Implemented collaborative commenting functionality to support review workflows and communication between stakeholders.
- Integrated AI-powered grammar checking features to improve report quality and consistency.
- Refactored and optimized UI components for better performance, scalability, and user experience.
- Designed and enhanced report editing workflows to improve user productivity and reporting efficiency.

Asset & Workflow Management Platform (iGEAR)

- Developed a claims management feature to streamline claim submission and tracking workflows.
- Implemented activity tracking and notification functionality using Django Activity Stream.
- Enhanced existing user interfaces to improve usability, navigation, and overall user experience.
- Collaborated with team members to ensure seamless integration between frontend and backend components.

Intekma Corporate Website

- Migrated the company website from WordPress to a custom-built responsive frontend using HTML, CSS, JavaScript, and Bootstrap, improving maintainability and design flexibility.
- Recreated existing pages while improving responsiveness, maintainability, and performance.
- Implemented reusable UI components and optimized layouts for a consistent user experience across devices.

PETRONAS Chemicals MTBE Sdn. Bhd. (PC MTBE)

Kuantan, Pahang

Data Analyst and Support Team Trainee (Internship)

August 2023-January 2024

- Performed data analysis and visualization using Power BI to support business decision-making.
- Developed interactive dashboards and reports to track key performance metrics.
- Provided technical support for data management systems and collaborated with cross-functional teams to optimize workflows.
- Managed documentation and multimedia assets during turnaround operations

UNIVERSITY PROJECTS

Cabin Crew First Aid: Anatomy and Physiology of the Human Body

(2024-2025)

Final Year Project

- Developed an interactive web-based learning platform integrating **3D anatomical models, quizzes, and multimedia content**
- Implemented frontend using HTML, JavaScript, and Bootstrap, with Firebase for backend data handling
- Integrated **Google Model Viewer** to render 3D models directly in the browser
- Designed the system to improve engagement and understanding for first-aid training scenarios
- Collaborated with industry expert from Malaysia Airlines Academy

Analysis on Climate Trends Across Southeast Asia Dashboard

(2024)

- Developed interactive dashboard using Tableau
- Performed data cleaning using Microsoft Excel
- Performed explanatory and exploratory data analysis (EDA) using SAS

Gogo Café Web Application

(2023)

- Designed and developed a web application system using HTML, JavaScript, CSS and Bootstrap for front-end while PHP and MySQL for back-end.
- A web application named Gogo Cafe which allows users to check the menu from the cafe, make a reservation and order food through the system.

EDUCATION

Universiti Malaya

Kuala Lumpur

Bachelor of Computer Science (Multimedia Computing)

September 2021 - February 2025

- Major in Computer Science, Minor in Multimedia Computing
- CGPA: 3.62
- Relevant coursework: Web Programming, Data Visualization, Rendering and Animation.

Universiti Malaya

Kuala Lumpur

Foundation in Life Sciences

July 2020 – April 2021

- CGPA: 3.90, 4.0 for 1 semester out of 2 semesters
